### **EXAMINER'S AMENDMENT**

This action is SUPPLEMENTAL to the allowance mailed 10 March 2010.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The abstract is to read as follows:

"The invention includes generating a start scan signal at a user interface of a client device, transmitting the start scan signal from the client device to a scanner, receiving the start scan signal at the scanner, and scanning a document with the scanner to generate document data, in response to the start scan signal. The user interface can include a web browser and the start scan signal can be generated by activation of a control element defined in a hypertext mark-up language (HTML) document displayed on the web browser. The method can also include transmitting the document data from the scanner to the client device, receiving the document data at the client device, and generating a display including the scanned document on the user interface of the client device, based on the document data. The display can be generated from a hypertext mark-up language (HTML) document."

### ***Drawings***

The drawings are objected to because the drawings, particularly Figure 3, contain handwritten marks. Corrected drawing sheets in compliance with 37 CFR

1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

Claims 1-16, 18-27, 29-33, 35-53, and 55-75 are allowed.

***Conclusion***
